

Registration for a Master's Project

Registration is required for 15 ECTS credits to be awarded. No further action is required to book the module. The provisions of the relevant program regulations apply.

This form must be signed by all participating students and the professor. The professor will ensure that this form **is submitted to studies@ifi.uzh.ch promptly and before the start date.**

The topic, approach and composition of the project group will be determined by the relevant professor before the start of the project.

Title of project	
Start date	
End date	
Professor	

Each group member also has to sign the "Agreement on the rights..." starting from page 2!

Student ID	Last name / first name	CM*	Signature of student	Grade

***CM = semester in which the Compulsory Module of your major has been passed, such as "FS21".**

Date _____ Signature of professor _____

Grading date _____ Signature of professor _____

Project title (will be transferred to Academic Record)

Agreement on the rights to written works and artifacts in Informatics at the University of Zurich

(The type of paper is defined on the registration form)

Current legislation states that the copyright of written works and any artifacts that have been produced in the process of completing them (in particular, software) remains with the student.

Because such work is created under the immediate supervision of the mentoring teaching and research assistants and professors, is based to a significant degree on their ideas, and relies on the use of the resources of the department, the student must grant the Department of Informatics the rights of use to such work by way of the following declaration.

I,
hereby grant the University of Zurich, as represented by the Department of Informatics, the irrevocable, non-exclusive, transferable, and sub-licensable rights of use, free of charge, to my written work and to all of the artifacts under copyright protection created in the context of the work (in particular, software). Furthermore, I agree that the Department of Informatics may publish my work in its entirety and/or in the form of extracts on the Internet, and may distribute printed versions thereof to interested parties.
